

Fourth Year Of War

THE WAR HAS NOW ENTERED ITS FOURTH YEAR. In the past twelve months we have triumphed and reversed, but slowly and surely the offensive is now being taken by the Allies. The last summer, courtesy of Hitler's fateful march into Poland, the United States has entered the war on our side, and has taken her place on the fighting front on land and sea in the air. We have also entered a full alliance with Russia, that gallant nation which has led the Nazis at bay in spite of overwhelming odds. At the same time, we have adopted a powerful offensive in Japan, who has broken down many of our defenses in the Far East, and whose strength and determination will not be easily overruled. Great Britain is still in the lead, and it is possible that it is possible that the next year will see further blows delivered to the Empire in the East.

At this time we might compare our position with that of Germany. Hitler marked the third anniversary of the outbreak of war with a speech appealing for the most ardent support of the people to support the war effort. He also appealed for supplies of warm clothing for his armies in Russia, now being wintered in the long campaign, which was scheduled to end many months ago. In addition, Germany is now involved in the initial stages of the Battle of Germany. In the autumn of 1940 the Battle of Britain was fought in the skies over the English Channel. In the defense of the skies over Germany and occupied Europe. The great bombing raids, now being carried out regularly in German cities, show that we are winning this air battle. With the numbers of planes and men in the Allied nations constantly increasing there is no doubt as to the final outcome.

Canada's Effort Grows

Canada commences the fourth year of the war with the importation of new and heavy income taxes, and with the institution of Selective Service. Before the end of 1942, the government expects to have added thousands of men to the armed services and to have increased as far as possible, to have every man and woman in Canada, in the place where they can give the greatest contribution to the war effort. With the armed services and industry going to greater and greater extent, there is no doubt that Canada is prepared to play her full part in the offensive that will eventually bring an end to the conflict. At present the government expects that they can do in battle and in the air, and that they will be able to match their courage and endurance until victory is attained.

Canada commences the fourth year of the war with the importation of new and heavy income taxes, and with the institution of Selective Service. Before the end of 1942, the government expects to have added thousands of men to the armed services and to have increased as far as possible, to have every man and woman in Canada, in the place where they can give the greatest contribution to the war effort.

With the armed services and industry going to greater and greater extent, there is no doubt that Canada is prepared to play her full part in the offensive that will eventually bring an end to the conflict. At present the government expects that they can do in battle and in the air, and that they will be able to match their courage and endurance until victory is attained.

Scarcity of imported fruit is giving rise to considerable anxiety lest deficiency of vitamin C should be suffered by the general public. As the main source of vitamin C, and mothers who have come to realize the importance of this vitamin for the health of their children, are often at a loss to know how to get a substitute. The general public is often at a loss to know how to get a substitute. The general public is often at a loss to know how to get a substitute.

The official amount of vitamin C (ascorbic acid) needed by an average adult is in quantities much larger than a vitamin. The average adult needs about 10 mg. of vitamin C daily. The average adult needs about 10 mg. of vitamin C daily. The average adult needs about 10 mg. of vitamin C daily.

It will be observed that potatoes are not included in the table, since the method of preparation does not take account of the fact that they are eaten in quantities much larger than a vitamin. The average adult needs about 10 mg. of vitamin C daily.

Vitamin C, however, is not among the most stable of the vitamins. It begins to lose its power as fruit or vegetables are gathered. This loss continues during storage. Part of the vitamin is lost in the cooking process, and prevention of some of this loss is one of the main advantages of cooking potatoes unpeeled. Quick use of temperature and fast cooking help rapid destruction of the enzyme which would otherwise break down the vitamin, lead to greater preservation, than the alternative method of gradual heating from cold water. All slow cooking methods including the use of crock pots, and the method of cooking.

Cooled green vegetables, rubbed through a sieve, can be given to young children as a vegetable soup, or as a vegetable puree. The average adult needs about 10 mg. of vitamin C daily.

Postal card to the Western Division Health League of Canada, 111 Avenue Road, Toronto, Ontario, will bring you a free vitamin card for ready reference.

Depressing Letters In Enervable Position

Should Not Be Sent To Fighting Forces In Britain

Mr. H. G. D. Cress, commander of a Canadian corps overseas, appeals to Canadians at home not to send depressing letters to the fighting forces in Britain.

Mr. Cress was brought by Air Force Minister, who visited Gen. Cress during the minister's recent trip to the United Kingdom. Mr. Cress told a press conference that the Canadian troops in the fighting forces in Britain.

The Individual Citizen's Army

A Weekly Column About This And That In Our Canadian Army

By Alan Macfarlane

Three weeks ago I devoted this space to the subject of drill. Here comes the same subject again, but now we are looking at it from a different angle. It is the question of the individual citizen's army.

THE BATTLE OF THE ATLANTIC IS BEING WAGED AS RECKLESSLY AS EVER TO CURB SUBMARINES

Ottawa.—Royal Canadian naval authorities in a statement issued today although shipping losses in the Atlantic dropped materially in July and August, the Battle of the Atlantic was "of far greater scope than ever before experienced" and was being waged as recklessly as ever.

The statement, issued through the communications office, said the shrinkage in losses in the month of August was due to "a great deal of false optimism."

The statement said Canadian warships were on patrol and escorting convoys in the St. Lawrence and the Gulf of St. Lawrence and that the navy was hearing an even greater strain now than previously, rather than being able to relax its efforts.

The statement added that a recent report from the United Kingdom, that shipping losses in July and August were "gratifyingly small," had been "carefully examined" and was found to be "entirely untrue."

The statement said the Battle of the Atlantic "is still being waged as so hotly as ever."

Canadian authorities, the headquarters of the navy, said that the Battle of the Atlantic had been waged over more than 18 months but is a 12-month battle.

It added: "In the three years during which naval forces, with the assistance of air forces, have been fighting enemy U-boats and raiding aircraft so that merchant ship convoys through the Atlantic, there have been other good months as well."

It added, however, unfortunately the (Canadian naval authorities) point out, also been some exceedingly grave months in which merchant shipping losses have been dangerously high.

"From past experience," the navy said, "it is known that the knowledge of their task, they were that it may be expected that the enemy again will score big successes."

The Battle of the Atlantic, in its fourth year of war, is of far greater scope than ever before experienced. The beginning of this war, enemy U-boats were confined to the waters of the ocean. Canadian destroyers, in these days, crossed the ocean to join battle with them, knowing their names and water.

With the fall of France and the opening up of French ports in the hands of the enemy as U-boat bases, submarines were able to operate across the entire Atlantic and even across the Gulf of St. Lawrence.

Canadian warships now have to fight the battle from the side of the ocean to the sea.

"Once U-boats are on this side of the ocean it is just as easy for them to make their attacks off Canada's coast as it was earlier in the war for them to score their successes off the United Kingdom."

Canadian Navy authorities now must maintain a constant submarine patrol in its own waters and must be ready to intercept any U-boat for the convoys. One-third of the Atlantic is being patrolled by Canadian navy, and the first loss of the admiralty, the Rt. Hon. A. A. Alexander, recently said in a statement that the men and the ships from Canada have been doing.

"This tribute, together with the recently issued statement from the United Kingdom that less than one-half of one per cent. of the ships in convoy have been sunk since the outbreak of war, and another statement that the shipping losses in July and August were gratifyingly small, Canadian authorities feel may tend to give the false impression that the Battle of the Atlantic is practically over. To the contrary, they say, it is still being waged as recklessly as ever."

"With her ships on patrol and escorting convoys in the St. Lawrence river and the Gulf of St. Lawrence, as well as in the Atlantic itself, Canada's navy is bearing an even greater strain, rather than being able to relax its effort. There can be no easing of the strain in this conflict with an enemy who has concentrated his major and extensive naval activities in submarine warfare, it is pointed out."

PRESSURE ON BELGIUM

London.—German authorities are reported to be putting pressure on King Leopold of the Belgians to establish a pro-Nazi government in Belgium. It is said the king has refused flatly on the grounds that such action would make him a traitor to his people.

DANES WERE SMART

London.—British officials hear that as firebombs, Danish saboteurs are really hot stuff. After affecting a recent blaze they proceeded to turn in false alarms for other plants. So by the time the firebombs reached the real mark, considerable damage had been caused.

Two hundred tons of aluminum were yielded by a nationwide collection of old bottle caps in Sweden, begun about a year ago.

GERMAN LOSSES

Servies Issue Special Nazi Communiqué

Munich.—A special Nazi communiqué said that 73 enemy divisions were routed by the Soviet army in fighting on the Russian front from June 22 to August 1, 1941.

The Soviet losses in personnel and equipment were estimated at 20 divisions, of which 14 were tank units.

Giant Bomber Reaches Canadian Factory

The world's mightiest bomber is the Avro Lancaster pictured above at Malton airport, near Toronto, where it is now on display. This warbird, soon to be in production at a Canadian factory at Malton, was flown to Canada by the Royal Canadian Air Force. Below is a group of distinguished visitors viewing the plane. Left to right in the centre of the group are Capt. Newton Collins of Mississippi, the co-pilot, Capt. C. H. Pym, the pilot, and the Hon. C. D. Howe, minister of munitions and supply.

WAR has taken over the romance of commercial aviation and this husky infant of Canada's industrial life now is being used almost entirely directly or indirectly in the war effort. Civil aviation probably has converted itself into a military medium more than any other industry operating before hostilities broke out in 1939. Ninety per cent. of the industry is devoted to war work and it is difficult to get freight or passenger space without a priority.

German Exploitation

BUILT UP QUICKLY
Germany's air force was not officially constituted until Feb. 26, 1935, but at the outbreak of war four years later was more powerful than the combined strength of England, France and Poland.

1991-1992

Hoodoes 1

Boy Valley, Banff National Park, Alberta, Canada.

UNEMOTIONAL figures and charts showed that if the present course continues English-speaking nations will be inhabited by veritable giants, with Canadians towering over all the rest. The visionary picture of the man and woman of a century from now was contained in a publication of the Dominion Bureau of Statistics covering heights and weight survey of 78,000 Toronto elementary school children, and a check of the figures thus obtained against similar surveys in other countries.

thousand old lightbulbs from a thousand old lightbulbs will provide enough of these metals for forty compasses. Zinc from the same number will provide sufficient of this metal for twenty-three 37 millimeter shells.

care for in 438 country house
nursery, many of which are
the stately and spacious homes
of England.

Figures, after all, are only
figures; however, if one pauses
to reflect on what these particu-
lar figures mean, the horror of
this monstrosity of modern war-
fare can, perhaps, be faintly
realized.

The men who first losted this
fearful holocaust of death and
destruction among innocent peo-
ple, boasted that no barbarism
could reach their own cities and
people. These are the men at
present 30,000 civilians were slaugh-
tered from the air in the inter-
war, and many thousands more
in Warsaw and Belgrade.

Therefore, it is not surprising
that the Air Marshal has been
promised to "accuse the Reich."
The city of it is that the ac-
cusing is unlikely to reach the
heart of the particular man responsible
for such devices.

Since it was announced from
Ottawa only recently that there
was a shortage of beef in Cana-
da, the news that the Wartime
Prices and Trade Board has or-
dered a reduction of 1 cent per
pound in the price of beef sounds
rather strange.

There's a kind of topsy-turvydom in an order
that shatters all the dogmatic
theories of the economists.

Meanwhile, it is stated that
farmers in Southern Alberta
have marketed crops of commercial
mustard, and that one car-
load of this mustard has been
shipped East. Presumably in hot
pursuit of the elusive beef.

Stork, by lighting in the early
hours of Thursday morning,
a large barn on the farm of J.
Martin was burned completely
to the ground.

Harry Sturman, R.C.M.P., is
visiting the town and expects to go
hunting on some of his old stamp-
ing grounds.

P.O. Colin Smart, of England,
and Fit-Serg. Jack Gillies, of
Gloucester, Ontario, are mem-
bers of the R.A.F., were week
end guests at the home of Mr.
and Mrs. Win. Gibson.

Sergt. L. D. Staples, R.C.M.P.,
who is now stationed in Edmon-
ton, was on week end visit at
his home in Morrin. With friends
Staples he visited friends in
Delia on Saturday evening last.

Mr. and Mrs. William Sinclair
have received word of the
deaths of their two sons, who
were in the 13th Field Battery, R.C.A.

A heavy electric storm passed
over the district between 4
and 5 a.m. on Thursday, but little
rain fell. Harvesting progressed
rapidly throughout the week
because of the very favorable
weather.

No reports of frost have
been received from the north
yet. In the village and in dis-
tricts to the west on both Satur-
day and Sunday nights. So bad
was the weather that the traf-
fic was temporarily suspended.

A heavy general rain swamped
the whole district on Tuesday
morning, and it now seems pos-
sible that little further harvest-
work will be done this week.

Canadian Apple Production
The Hortons of Hamilton estimate
apple production this year in Canada
at 1,500,000 bushels.

The Toronto News says that the
total of the year's crop is 1,500,000
bushels, or more than half a million
bushels more than last year's crop.

The Hortons of Hamilton estimate

Minutes of the M.D. Council of Lambton

The council met at Crignaleigh on
Saturday, September 8th, at 2:30
p.m. All members were present,
with the exception of Dr. McDonald.

The minutes of last meeting were
read, and on the motion of
Dr. McDonald were adopted.

An offer was made by the De-
partment of Municipal Affairs wait-
ing that the discounts that could be
allowed on old insurance taxes
might be those as allowed under
the Tax Consolidation Act, or under
compromise settlement under Sec-
tion 167 of the Municipal Act, when
the compromise was approved by
the Minister of Municipal Affairs.

Com. Dunfield reported that the
petition forwarded to Dr. Cross and
the Minister of Municipal Affairs in
regard to the House Municipal Affairs
regulations were being consid-
ered, as an official of the Dept.
had interviewed the Board of the
House Municipal Hospital at their
last meeting in regard to the peti-
tion and Harry Nelson made ap-
plication to the council to defer
taking title to the \$24,321-74, as
the present line, resulting in the
reaching of some agreement with
the Great West Life Assurance Co.
It was decided that the council
be not taken to the \$24,321-74,
until next meeting. Carried.

The secretary reported that J. W.
Wills had declined to purchase the
N.W. 21 and S.W. 28-32-16-64, at
the price set by the council at the
last meeting, and asked that his de-
posit be returned.

The secretary was instructed to
advise E. J. Browne if it was neces-
sary to advertise land for sale by
tender under the Tax Recovery Act.
Moved by com. Farrell that by Res.
No. 127 (to approve sale of E. J.
Browne's land) be carried.

By Res. No. 127 having received
his first two readings, it was moved
by com. Nelson that this By-law
be adopted as read. Carried.

Gottlieb Gross offered to purchase
the N.W. 21 and S.W. 28-32-16-64,
at \$15-36-74, for \$15,000-00-00
this fall, and the balance in two
payments. The secretary was in-
structed to advise Gross that this
land would not be sold until four
years after it had been put up for
sale.

The secretary was instructed to
advise E. Schaefer that he could not
buy the bay on the road allowance
between the N.W. 21 and S.W. 28-32-16-64,
for \$10.00 per lot that he
wanted.

The secretary informed the coun-
cil that B. A. Kirkby had paid up
the taxes in full on S.W. 28-32-16-64,
and that he might be allowed to
buy the land on the road allowance
between the N.W. 21 and S.W. 28-32-16-64,
for \$10.00 per lot that he
wanted.

The secretary was instructed to
advise E. Schaefer that he could not
buy the bay on the road allowance
between the N.W. 21 and S.W. 28-32-16-64,
for \$10.00 per lot that he
wanted.

It is obvious that many wheat growers
are not aware of the latest up-to-date
labor saving methods of grain feeding
and management. Those who are
handling grain for the first time should,
therefore, take the time to find out
to find out from their nearest Ex-
ecutive Agent, or University, or Provincial
Department of Agriculture, or their
District Agricultural Representatives,
the methods of feeding and man-
agement that will best suit the nature
of their individual farms and the
factors actually have on hand.

I am sure that many young men
going into the grain business are
not aware of the latest up-to-date
labor saving methods of grain feeding
and management. Those who are
handling grain for the first time should,
therefore, take the time to find out
to find out from their nearest Ex-
ecutive Agent, or University, or Provincial
Department of Agriculture, or their
District Agricultural Representatives,
the methods of feeding and man-
agement that will best suit the nature
of their individual farms and the
factors actually have on hand.

of their individual farms and the
factors actually have on hand.

I am sure that many young men
going into the grain business are
not aware of the latest up-to-date
labor saving methods of grain feeding
and management. Those who are
handling grain for the first time should,
therefore, take the time to find out
to find out from their nearest Ex-
ecutive Agent, or University, or Provincial
Department of Agriculture, or their
District Agricultural Representatives,
the methods of feeding and man-
agement that will best suit the nature
of their individual farms and the
factors actually have on hand.
